

The Electronic Anti-Scale System

Multiple Applications in Supermarkets

No Salt
No Chemicals
No Maintenance

German Technology
Absolutely Magnetism-Free

Vulcan — The eco-friendly solution

Vulcan is the eco-friendly water treatment system that protects piping systems and production equipment against scale and rust deposits. Special electronic impulses change the crystallization process of the liquid calcium, removing its adhesive properties. This results in an effective chemical-free solution for your supermarket operation.

Improving supermarket operations by:

- ▶ Prolonging the life of water based production equipment
- ▶ Protecting the whole water system
- ▶ Saving time on maintenance and cleaning
- ▶ Increasing the efficiency of hot water systems
- ▶ Reducing the need for descaling chemicals and salts
- ▶ Preventing new scale deposits from forming

Misters in food section

Supermarket misters

The fine spray nozzles and filters of mister systems suffer extremely from scale build-up.

With the Vulcan treatment misters in food sections clog up less, filters last much longer and pressure increases resulting in finer mist production. The misters will also require less frequent drainage and flushing.

Piping systems remain clean and old scale deposits are greatly reduced.

Grease traps have reduced odors and more consistent, less clattering grease.

Cooling towers require fewer chemicals, less cleaning and scale is significantly reduced.

avril

Installation Details
Location: Avril Supermarket
 Wpt de Laval, Québec, Canada
Model/Arch: Vulcan 3000 was installed on the greenhouse water after
Treatment area: daily droppers are used to water the entire production
Scale problem: after 1 year without water treatment, there was an issue with limestone building up in the irrigation system which blocked up the droppers. 60% of the entire production (the droppers, 60% of the entire production even distribution of water). It required a lot of manual labor to clean the unwatered parts of each tray in order to prevent losses.
Client's feedback: After 7 months with Vulcan, we're seeing a huge improvement in regards to the even application of water. From now on, manually adding water to the unwatered parts of each tray won't be necessary since there isn't any. We're highly pleased with Vulcan as well as the service.
Installed by: Gestion L.B. inc.

"After 7 months with Vulcan, we're seeing a huge improvement in regards to the even distribution of water. From now on, manually adding water to the unwatered parts of each tray won't be necessary since there isn't any! We are totally satisfied with Vulcan as well as the service."

Ice machines operate more efficiently and ice cube formation is enhanced.

Faster cleaning of kitchen and bathrooms. Considerable savings in cleaning agents.

Dishwasher scale is reduced significantly and dishware is now longer spot-free.

Vulcan Prevents Scale and Rust

- ✓ Reduction of existing scale in the piping system
- ✓ Installation without cutting the pipe
- ✓ From ½" up to 40" pipe diameter
- ✓ Works on all pipe materials – iron, copper, plastic, stainless steel, PVC, compound pipes, PE-X, etc.
- ✓ 100% maintenance-free
- ✓ Eco-friendly solution without salt or chemicals
- ✓ Prolongs life of machinery and equipment
- ✓ Important minerals remain in the water
- ✓ Long life – fully cast in acrylic
- ✓ 25 year international warranty
